29mm Neutrex Disrupter on Stand

DESCRIPTION

The 29mm Neutrex is Proparms' largest disrupter which is available in both Steel and Titanium. It is a powerful and easy-to-use tool capable of disrupting and de-arming large IED packages. Developed in collaboration with the RCMP and EOD Technicians of Sûreté du Québec in Canada, this disrupter is the result of extensive testing with industry experts. Setup and preparation is less than 2 ½ minutes. The newly redesigned disrupter stand is engineered with lightweight and robust materials, allowing for easy deployment and reliable performance. The barrel clamp features a recoil absorbing mechanism, using gas cylinders which allows for a powerful disrupter and de-armer for use with robotic platforms. The maximum recommended standoff distance is up to 3 metres (10ft.) for water shots, depending on the target. Experience the ultimate in disrupter and de-armer technology.
