

## MISTRAL DRUG DETECTION & IDENTIFICATION PRODUCTS

Presumptive Drug Tests identify suspect narcotics and controlled substances and provide police agencies with quick results in the field or lab. Convenient and easy-to-use, Presumptive Drug Tests contain internationally accepted and specially designed reagents that produce a series of color reactions (indicators) to help the operator determine if a drug is positive for unknown or suspect material.

### Tests to Meet Every Requirement

Mistral Security, Inc. offers three types of Presumptive Drug Tests:

#### 1. PDT Pouches

- Identify suspicious or suspected substances
- 10 tests per box
- The lowest per test cost
- Packaging designed for ease-of-use
- Quick-test results
- Internationally proven test reagents

#### 2. PenTests

- Detect trace amounts of drugs as well as bulk amounts
- Fast and easy-to-use
- An optional pouch can be carried on the person or easily stored in vehicles
- Can be used in hot as well as warm temperatures
- Will not destroy the substances that they test (can be retested by forensic labs)
- Two PenTests, D4D and Coca Test, can detect most drugs with just two tests

#### 3. Aerosols

- The fastest and easiest tests on the market
- Capable of trace detection as well as bulk drug identification
- Will not destroy the evidence that is tested
- An optional pouch can be carried on the person or easily stored in vehicles
- Two aerosols, D4D and Coca Test, can detect most drugs with just two sprays
