

One Ecosystem.

Precision hardware. Integrated intelligence. End-to-end security.

INTEGRA

A complete tactical surveillance solution from sensors to software.

Command and Control
Data Fusion
Next Generation AI

Designed, engineered and supported entirely in-house.

Total Control.

XTREME CAM

The **XCAMS** feature different types of camera modules, with different focal lengths and brightness, for greater adaptability during installation. Specifically designed for concealment in tight spaces and adaptable to different operating scenarios.

The **Firmware that manages the camera and the Pan-Tilt-Zoom (PTZ) is designed by the SIO S.p.A. group.**

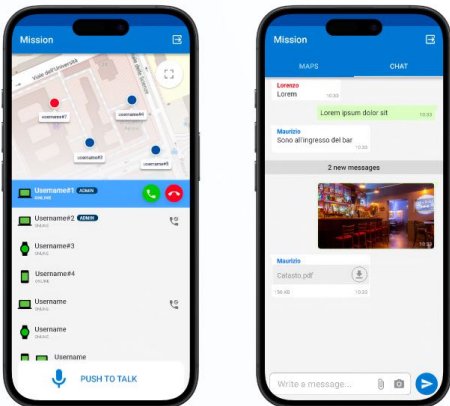

- SHORT RANGE** from 0 to 100 m
- MID RANGE** from 100 to 300 m
- LONG RANGE** from 300 to 600 m

- Face Recognition and Object Recognition
- Compact size with high-quality zoom
- Precise Tilt movement for better positioning and concealment
- Easy to conceal with small mounting holes
- Simplified mechanics with a single motor
- Dual optics: motorized varifocal and fixed lens
- PTZ and focus control via IntegraX interface
- Accurate on-screen movements using dedicated neural network
- Advanced video stream analysis tools
- Motion parameter configuration: sensitivity and exclusion zones

SIO TALK

App for secure communication

SIO Talk is a secure communication platform developed for LEAs who require true privacy, operational features and full control of data. It is not a download-and-go app, it is a mission-ready technology designed for that work where security is not optional.

XTREME TACTICAL DEVICES

SIO offers a complete suite of state-of-the-art tactical surveillance solutions through its **XTREME** product line and **INTEGRA X** command-and-control platform, developed entirely in-house in Italy.

These technologies are specifically designed to support Law Enforcement and Intelligence Agencies in conducting highly discreet and effective operations in complex and hostile environments.

The XTREME family includes advanced devices for GPS tracking (X-FIX), audio interception (X-AUTO, X-HOME) and integrated audio/video surveillance (X-VIDEO, X-CAM), optimized for urban and off-grid deployment scenarios.

VEHICLE

SIO LAWFUL INTERCEPTION

SIO provides advanced **Lawful Interception** technologies tailored for government agencies and authorized law enforcement bodies.

Our in-house solutions enable the secure, discreet, and real-time interception of communications across multiple channels - including mobile, landline, IP, and encrypted networks - always in full compliance with national and international regulations.

Thanks to over 30 years of experience in the field of tactical surveillance, our lawful interception platforms are designed to meet the highest operational and legal standards. Modular and scalable, they support complex investigative scenarios involving organized crime, terrorism, and cyber threats.

Key features include:

- Full-spectrum interception: voice, SMS, MMS, VoIP, email, and chat applications
- Integration with telecom operator infrastructures
- Multi-user analysis platform with role-based access
- Real-time monitoring, keyword alerts, and automated transcription
- Data correlation, geo-location, and intelligence fusion
- Compliance with ETSI and local legal frameworks

SIO ensures complete chain-of-custody, data security, and evidence integrity — from capture to court.
