BLASTSAFE: THE ARC SERIES

Total Containment Vessels

ARC 6GT / ARC 9GT

The ARC 6GT and ARC 9GT Total Containment Vessels are approved by the Department of Defense Explosive Safety Board (DDESB) for 13.23 lbs. (6 kg.) of TNT equivalent material and 19.8 lbs. (9kg) of TNT equivalent material respectfully.

Both ARCs can be operated in a sealed mode enabling the mitigation of biological and/or chemical hazards up to its full explosive. Each vessel is equipped with pressure release valves and includes a sealed electrical cable penetration device.

After each detonation, minor maintenance should be applied to return chamber to operating mode.

The unit can easily be operated manually in case of total electrical failure.

Miscellaneous Options Available Upon Request

- Custom design and additional accessories.
- Color of ARC may be changed according to customer preferences.
- Fragmentation sleeve.
- Sampling unit for liquid and vapor.
- Customized compartment for EOD tools.
- The ARC can be mounted directly on trailer.
- The ARC can be integrated into beds of most standard Bomb Squad vehicles.
- Decontamination unit.
